

HANDTMANN RE-ENGINEERED MACHINES

The factory re-engineered original

**THE FACTORY RE-ENGINEERED
ORIGINAL**

TOP QUALITY ORIGINALS

Re-engineered machines from Handtmann

Now is the perfect time for a Handtmann original! With its modern and future-proof technology, a re-engineered machine from Handtmann ensures economical and reliable production.

We understand the challenges you face

You experience cost pressure but do not want to make compromises with respect to product quality... The Handtmann factory re-engineered originals are the answer. Our machines are developed for tough industrial use. They boast high levels of productivity over a long period, extreme robustness and reliability. With a Handtmann re-engineered machine, you therefore purchase premium technology for top product quality with excellent weight accuracy. And with our manufacturer's warranty you are not taking any risks.

Manufacturer's warranty means re-engineered machines are a no-risk buy

The professionally conducted overhaul of used Handtmann machines is carried out in the Second-hand Machine Centre in Zittau. It is a part of Handtmann Maschinenfabrik. In the newly-constructed, state-of-the-art assembly plant, used Handtmann machines are reconditioned in accordance with Handtmann quality standards. The machines are completely dismantled, cleaned and refurbished, and worn parts are replaced exclusively by new original parts. They are then assembled and tested to ensure they function perfectly. Our manufacturer's warranty guarantees reliable, top quality standards. Only in this way are first-class product quality, excellent portioning accuracy and high performance capabilities ensured in the long term.

MANUFACTURER'S WARRANTY

- Machines are completely dismantled and thoroughly cleaned
- The relevant machine tolerances are determined
- Preventive replacement of important functional components
- Complete replacement of all worn parts
- Installation of original Handtmann spare parts
- Final inspection using the computer-aided Handtmann quality inspection system
- Handtmann quality stamp with 6-month warranty

RE-ENGINEERED FOR ALL-ROUND USE

Choose just the right model for your needs

Be it small-scale producers, medium-scale producers or industrial high-performance production – the Handtmann product range of second-hand machines has just the right re-engineered original on offer for all performance classes and applications. Furthermore, the modular structure of our machines provides flexibility and scope for your production. Synchronisation with upstream or downstream process steps is easy. Versatile auxiliary devices and countless equipment options are optimum additions. Choose the model that perfectly matches your production.

VF 600 vacuum fillers

The classic among the vacuum fillers: You benefit from flexible vacuum fillers that are suitable for all-round use.

HVF 600 high vacuum fillers

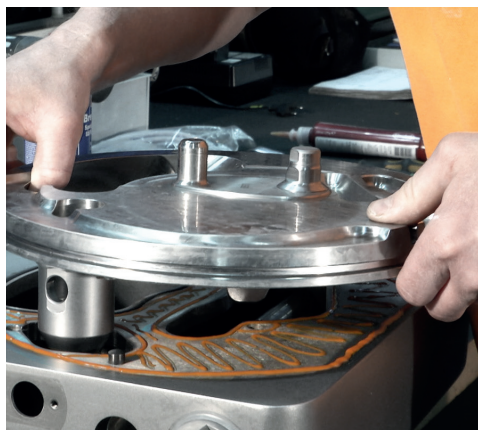

For premium quality and maximum performance: First-class with the production of boiled and cooked sausage, dry sausage and ham.

AL sausage filling lines

Automated and efficient sausage production: For all types of casing. With hanging or cutting. Fast and gentle.

From the best source – your Handtmann sales partner

Handtmann re-engineered originals are only available from the best source – from your authorised Handtmann sales and service partner. Only in this way can you be sure that your new second-hand machine is in top condition and comes with the quality stamp from the Handtmann Second-hand Machine Centre. And you will receive the whole range of services, such as financial advice, customer service and maintenance contracts. For re-engineered and new machines – the service provisions are always first-class.
